

QUESTION 1.1

Following task is done is **AUTODESK FUSION 360**

PROPERTIES	
Bodies (1)	
Area	2.488E+05 mm ²
Density	0.008 g / mm ³
Mass	14741.187 g
Volume	1.914E+06 mm ³
Physical Material	Steel
Appearance	Steel - Satin

Density given is 0.0077g/cubic mm. But Fusion 360 least count 0.001, therefor it is showing the round off value 0.008g/cubic mm. But calculation values are fine.

Volume = $1.914 * 10^6$ cubic mm.

Mass of object = 14741.187 g
